castle. Evidently he wanted to play c5 and not waste a tempo with his bishop after dxc5 (although I think recapturing with the knight would be more natural, and I don't think I would play dxc5 anyway). **10.e4 1:08** White: 1:23, Black: **10...c5 11.d5**

15...Bc8! 39 I missed this simple retreat. Black wanted to trade off an attacker,

and even though he said he didn't realize that the other knight was bound for f5, I still think this was a good move, since his bishop was useless on b7.

18...b4 19.Nd1 c4! Black correctly realized that I was trying to put a knight on c4 - that was the point of a4. This mobilizes the queenside majority, covers the c4 square, and opens c5 for his knight in some cases. I think my opponent and I have been very evenly matched in all three of our games so far, and I have been impressed by his ability to drum up counterplay and feel for dynamics. Many of my favorite opponents over the years have been strong at using tactics to force through their strategic ideas and prevent me from playing a purely positional game. Dr. Jonah Busch is one opponent that comes to mind, and every time I played him, I felt like I had to dig very deeply into the position to figure out his ideas and how he was going to implement them. **20.Ne3 Rc8 31** White: 46 min, Black: **21.Qf3**

[21.Qh3 This seemed more committal - if my kingside attack doesn't go anywhere, my queen would be stuck in Siberia]

21...Re8 22.Nf5 Bf8 Black's defense looked very logical to me - now I have three attackers against two kingside defenders (Nf6/Bf8). I decided I needed to bring another attacker in with f4.

27...c3 28.bxc3 Rxc3

[28...Qxc3 29.Rc1 This is one of those frustrating positions in which every move I come up with is labeled a game-losing blunder by the engine. Qb4 30.Rxc8 Rxc8]

29.Kh1 I didn't want to have to deal with any checks from c5:

[29.h3 Bc5+ 30.Kh1 g6 31.Nh6
Be3 32.Nxf7+ Kg8 33.Nh6+ Kg7]

29...Qxa4 My opponent said he realized that this pinned the pawn on e4, because I certainly don't want to trade queens. What I failed to grasp was that this not only protected the Nd7 but also protected the Re8 if the knight had to move at any point. **30.Nd6** This was not an easy decision, because my knight on f5 looked so much better than his bishop. But I couldn't see how to continue, and I thought I would need to fight for the dark squares in this position, particularly e5, which I can now do with Rde1 or Bf4. Sacrificing the pawn on the queenside meant that my position had an "expiration date" - eventually Black will

push those queenside passed pawns.

[30.Nd4 My big problem in this position is that Black has firm control over the e5 square for now. I also don't know what my knight is doing on the c6 square. Rc4 31.Nc6 Nxe4]

30...Bxd6 At this point, I had 18 minutes to my opponent's 5. This is in my self-imposed "green zone", so I was pressing for a win. **31.Qxd6 Rc2!?**

[31...b2]

32.Rde1?? This is what my scoresheet says, but I almost think that it must be wrong, because Nxe4 in response looks so obvious. After the game, we even agreed that stopping Nxe4 with Rde1 was a good idea.

[35.e5 Again, this move looks obvious, since the threats made by Ne4 are easily answered. I don't know if my scoresheet was wrong or if I just didn't see any of these moves. Ne4 36.Qc7]

35...gxf6 This happens to me all the time - when my opponent is in time trouble, he plays faster, so I have less time to think than what I am accustomed to and fall into time trouble myself. I heard Sammy Reshevsky used to do this on purpose. I was down to 4 minutes, and we played the rest of the game on increment. I never went below 1 minute, and my opponent had a few close calls, but I thought he kept his head a lot better than I did. **36.Qxf6+ Kg8**

[43...Qxe4 44.Qd1]

44.h3 My queen endgame study consists of looking at 5-10 Geza Maroczy games on chessgames.com about once a year, thinking "wow, this guy was really good", and forgetting 90% of what I saw. I play queen endgames even more rarely, but I think the last one I managed to win was in the Golden State Open about 5 years ago. **44...Qe6** Already here I had the idea to push the pawn to e5, advance the kingside pawns, and advance the king via the dark squares with the queen and pawn as shelter. **45.Qg5+ Qg6 46.Qd8+ Kh7 47.Qh4+ Qh6 48.Qf2 Qg6 49.e5 Kg7 50.Kh2 Qg5 51.Qd4 Kh7 52.h4**

59.Ke7 Qf3 60.Qc4?? This is a very unfortunate square for the queen and is typical of my shallow analysis in time pressure.

[60.Kf8!! I needed to go one more square - the point is that the king is stuck on h7 and the queen can't give any checks, because the pawn falls on f7. Black is practically in zugzwang. I saw this line when I got back to my car and entered the game on my phone and thought I understood, but even if I had found this move, I wouldn't have known what to do next (I would have taken f7 at the first opportunity and tried to run my e-pawn). The engine line is: a5 61.Qd7 Kh6 62.Qd2+ (62.Qxf7 doesn't work: Qa8+ 63.Ke7 Qb7+ 64.Kf6 Qf3+ 65.Ke6 Qb3+) 62...Kh7 63.Qd7 Kh6 64.Kg8!! [68...Kxg6 69.e8Q+ was White's last trick]

69.e8Q b1Q 70.Ke6 Qxg6+ 71.Qxg6+ Kxg6 We both came away wondering if I was winning. I remember thinking I had probably let a winning position slip, but now, after reviewing the game with the engine, I'm not upset at all with the result. A chess player always has to be honest with himself/herself. I wouldn't have won that queen endgame with an hour on my clock. This was a very interesting and double-edged game which reminds me of the famous Ivanchuk-Yusupov rapid game from 1991 where the players played on opposite sides of the board. I still can't help thinking that there was a better way to continue the attack and break through, although my opponent's defense was impressive.

1.d4 d5 2.c4 e6 3.Nc3 c6 4.Nf3
 dxc4 5.a4 Bb4 6.Bd2 As White, I
 didn't recall the exact line on how to
 recapture the pawn once Black plays b5.

e3 is a better move here to open up the
 light-squared bishop but I wanted to be
 safe so Bd2 to remove the pin on the
 knight right away. 6...Nf6 7.e3 b5
 8.axb5 Bxc3 9.Bxc3 cxb5 10.b3
 This was the only correct move to re-
 capture the pawn. 10...Ne4?! 11.Ba5
 Qd5 12.bxc4 bxc4 13.Qa4+?
 Mistake as White. Ne5 is better. I
 expected Ne5, Ba6 and then Qa4+
 would not have been possible. A bit
 tunnel vision as White about re-
 capturing the pawn.

[13.Ne5 Ba6]
 13...Bd7 14.Qxc4 Qxc4 15.Bxc4 Nc6
 16.0-0 0-0 17.Bd3 As White, didn't
 even consider Ba6 here as I was
 preoccupied with Nxa6 and potentially
 weak back rank. 17...Nf6 18.Nd2
 Spent 15 mins here analyzing a variety
 of lines. The other contenders were 18.
 Rfc1, 18. Ng5 and 18. Bc7, none which
 are recommended by the engine. I felt
 okay with Nxa6 here since the dark-
 squared bishop of Black was already
 exchanged for my knight. Plus that
 exchange would allow me to double the
 rooks on 'a' file. So the idea behind Nd2
 was that while Black's light-squared
 bishop is stuck on d7, can I get my light-
 squared bishop to e4 and pin the knight
 or force the rook out of a8 to put
 pressure on the isolated 'a' pawn. But
 missed that I am losing control of e5
 square. 18...e5 19.dxe5 Nxe5 20.Ba6
 Ba6 seemed best to prevent either
 rooks coming to c8. Plus Bc7 was a
 strong follow up to block rook squares
 on back rank and potentially get Bb7,
 Rae8 and Bd6 to capture rook on f8. A
 bit ambitious but seemed it could be
 forced with some rook and knight
 activity from White. 20...Bc6?! 21.Bc7
 Ned7 22.Rac1?! Inaccuracy. Correct
 move is Rfc1. Took 6 mins to analyze

multiple lines again. Thought I had one of the rooks trapped once the f rook of White puts pressure to force Black's light-squared bishop off of the diagonal and frees up b7 square but completely missed 26. Nf6. Only noticed it on move 24. **22...Bd5 23.e4?! Nxe4 24.Nxe4 Bxe4 25.f3 Bd5 26.Rfd1 Nf6**

This is what I missed as White, in my calculation for move 22. With significantly low on time as compared to my opponent, I was worried about Black's 'a' pawn now. **27.Rc5 h6?**

For Black, the engine dislikes the two pieces for rook exchange. So much so that it is giving +2.9 to White, almost treating this move as a blunder. A light-squared bishop move by Black to avoid the exchange is the suggested way forward. As White, I didn't see as much advantage on the board after the exchange because managing bishop pair against two rooks leads to a very sharp game. Plus I was still worried about the 'a' pawn. **28.Rdxd5 Nxd5 29.Rxd5 Rae8 30.Kf2 Re6 31.Bd3** I had already analyzed 31. Bb5, Rc8 and some other lines before on move 30. So, Bd3 seemed best to block Kh7

31...Rc8? As White, mentally, this was the true blunder by Black. **32.Bf5 Rce8**

[32...Rxc7 33.Rd8+ Re8 34.Rxe8#] **33.Bxe6 Rxe6 34.g3** At this point it was just grinding out the win for White.

sequence and it happened exactly until **54. h6 51...Rh1 52.h5+ Kh7 53.Ke4 Rxb3 54.h6** The key here that took the pressure off was making sure to support the pawn with bishop. Once that is done, the only way to capture it is to capture it with rook for a rook-bishop exchange that is winning for White. **54...Kg6 55.Rxa6 Rh1 56.Be3 Rh4+ 57.Kd3 Rh3 58.Ra8 Rh1 59.Rg8+ Kf7 60.Rg7+ Ke6 61.Ke4 Rh4+ 62.Kf3 Rh3+ 63.Rg3** As White, I was a bit worried about the rook exchange but the bishop support for the h6 pawn was rock solid and I calculated two lines none of which could force f4 to cut off the support. So happy to exchange rook here. **63...Rh1 64.Kg4 Kf7 65.Rh3 f5+ 66.Kg3 Re1 67.Kf2 Ra1 68.h7 Ra2+ 69.Kf3 Ra8 70.h8Q Rxb8 71.Rxb8 Kg7 72.Bd4+ Kf7 73.Rh6 Ke7 74.Kf4 Kf7 75.Kxf5 Ke7 76.Bc5+ Kd7 77.Ke5 Kc7 78.Kd5 Kb7 79.Bd4 Kc7 80.Rh7+ Kd8 81.Bb6+ Ke8 82.Ke6 Kf8 83.Ra7 Kg8 84.Kf6 Kh8 85.Kg6 Kg8 86.Ra8#** Almost 1 hr of grind since the rook for two pieces exchange on move 28 with White being under 10 mins since move 32.

1.c4 e5 2.Nc3 Nf6 3.Nf3 Nc6 4.e3
Bb4 5.d4 exd4 6.exd4 d5 7.a3 Be7
7... Bxc3 is considered better, it gives
Black a bit of an initiative 8.cxd5 Nxd5
9.Be2 0-0 10.0-0 b6 I thought there
were a lot of things to like for White in
this position, and I was looking for ways
to get a rook to c1. It seemed like the
tactics would favor me and it seemed
like the knights were a bit loose, so I
started to attack. 11.Qa4 Bb7 12.Bb5
Na5 13.Ne5 Nxc3 14.bxc3 Qd6
The computer thinks this is even and
that I was actually behind earlier. I'm
surprised — I thought I had a bit of an
edge. 15.Bf4 a6 16.Be2 Qd5 17.Bf3
Qb5 18.Qxb5 axb5 I considered
avoiding the exchange with 18. Qd1
(which the computer recommends),
since I thought I had a better position,
but I thought I could go into the
endgame with a better position, so I
decided to go for it. 19.Be2 Nc6
20.Nxc6 Bxc6 21.Bxc7 Rxa3 22.Rxa3
Bxa3 23.Bxb6 Bb2 24.Bc5 Re8
Ok this was silly, I had calculated this
whole thing several moves earlier and
didn't stop to double-check — I hadn't
seen that ...Re8 would attack my bishop.
24. Ba5 would have been better, I would
simply be up a pawn. Probably my
simplest blunder of the game. I was
pretty unhappy about this and tried to be
tricky. 25.d5 Bd7 There was a lot going
on after 25. d5. First, taking the hanging
bishop would be losing. Second, taking
on d5 would be slightly better for White
(back-rank issues will make it hard to
capture the c3 pawn). Finally, retreating

A28

to b7 or a8 drops the b5 pawn. So Bd7 was really the best move here and my opponent found it. 26.Bf3 Bxc3 27.g3 b4 28.Rb1 Bf5 I should have played 27.g4 to prevent this from happening — now I need to sac the exchange to prevent the pawn from promoting. The annoying thing is that g3 doesn't even really provide luft, because Bh3 would still threaten a back-rank checkmate (and blocking with Bg2 wouldn't help). Things are looking a bit grim but hope isn't lost. I fought on. 29.Bxb4 Bxb1 30.Bxc3 Bf5 31.g4 Be4 32.Kg2 Bxf3+ 33.Kxf3 f6 34.d6 Kf7 35.Ba5 Ke6 36.Bc7 Kd7 37.Kg3 g5 38.h4 h6 39.hxg5 hxg5 40.Kf3 Re5 41.Kg3 Re4 42.Kf3 Rf4+ 43.Kg3 Rd4 44.Bb8 Kc6 45.Bc7 Kb5 46.Bb8 Kc4 47.Bc7 Kd3 48.Bb8 Ke2 49.Bc7 Ke1 50.f3 50. f3 was the final blunder. I should have kept moving my king back and forth but I was low on time and thought I was about to lose a pawn. 50...Rd3 51.Bb8 Ke2 52.Bc7 Rxf3+ 53.Kg2 Rd3 54.Bb8 Rd4 55.Kg3 Rd3+ 56.Kg2 Ke3 57.Bc7 Ke4 58.Kf2 f5 59.gxf5 Kxf5 60.Kg2 g4 61.Kf2 g3+ 62.Kg2 Kg4 63.d7 Rd2+ Of course, Black must check the king before taking the pawn. Dominic worked hard to grind out this win and it was not at all obvious how to get there, but now it's inevitable. I tried to make it tricky but he managed to solve all of the problems I tried to create for him. Great job! 64.Kf1 Rxd7 65.Bb6 Rd2 66.Ke1 Ra2 67.Kf1 Kh3
