## Falconer TNM Round Six Report

NM **Michael Walder** and Expert **Eugenio Garcia** drew a short, tense game on board one in the top section. With 5 points each both players maintain a slim ½-point lead over IM **Elliot Winslow**, who defeated Expert **Edward Lewis** convincingly, despite dropping a rook(!) at one point, and **Nicholas Weng** who fought his way out of a jam and overcame the stiff resistance of **James Bowen**. Winslow vs Garcia and Walder vs Weng seem likely pairings in what promises to be a dramatic last round next Tuesday.

Top board in the under 1800 section saw an incredible fight between **Venugopal Mani** and **Karl Stuart Kingma**, where both players took turns blundering a knight. The result was a draw, and Kingma with 5.5 points is now guaranteed a share of 1<sup>st</sup> place. Mani is one of six players tied at 4.5, a group that also includes Newsletter contributor **Richard Hack**.

**Neil Falconer** (1923-2014) was a Mechanics' Institute trustee. A remembrance penned by former Chess Room Director **IM John Donaldson** can be found here: <http://www.uschess.org/index.php/April/Neil-Falconer-1923-2014.html>

□ **Garcia,Eugenio**

■ **Walder,Michael**

MI Falconer TNM: 1800+ (6.1) 05.04.2022

[Winslow, Elliott C.]

The big question was, were they feeling combative? Garcia and Walder were half a point ahead of Ed Lewis, who faced Black and a 0-5 record against Winslow (one of two another half point back, along with Nicholas Weng). So for both of them a draw doesn't lock up first, but it does put them in excellent position going into the last round. **1.d4 4 Nf6 5 2.Nf3 10 g6 14 3.g3 13 Bg7 7 4.Bg2 5 0-0 6 5.0-0 7 d6 1:05 6.c4 24**

The Fianchetto System, known for strategic complexity. **6...c5 45**

The Yugoslav Variation.

[ 6...Nbd7 7.Nc3 e5 is the other story, the Classical Fianchetto. ]

[ 6...Nc6 is the Panno Variation, when both players have many alternatives besides the main 7.Nc3 a6 8.d5 Na5 9.Nd2 c5 ]

**7.Nc3 39 Nc6 40** Mike prefers to allow transpositions.

[The gambit line 7...cxd4 8.Qxd4 Nc6!? remains resilient, with recent games and articles showing its viability. ]

**8.dxc5 52** The Symmetrical Variation, the first sign of some moderation but still plenty of play.

[ 8.d5 Na5 9.Nd2 is the Panno again, a6 ]

**8...dxc5 8 9.Bf4 8**

[ 9.Be3 picks on the pawn directly, when Black can cover it Qa5 (or keep up the "flattery" with 9...Be6 ) ]

**9...Be6 5:20 10.Qa4 1:58**

[ 10.Ne5 has been the point, when Na5 was Kasparov's choice against Tal in 1987. In a rapid game on Moscow TV! They drew in 37. ]

**E65**

**2103**

**2073**

**10...Qa5 2:31** Insistent. White has done well with the queens coming off here, but it could be from rating imbalance in the sample games. **11.Rac1 4:03**

[The straightforward 11.Qxa5 Nxa5 12.b3 Nc6 saw some vague gestures at imbalance but eventually nothing: ½-½ (31) Tregubov,P (2588)-Zakhartsov,V (2486) Moscow 2018 ]

**11...Nh5 4:48 12.Qxa5 4:26 Nxa5 8**

**13.b3?! 18** The balance manages to upset even in this opening! White should probably save this bishop though.

[It's worth mentioning a game from not that long ago but still: a very young Magnus! 13.Bc7 Nxc4 14.Ng5 Bxc3 15.Nxe6 fxe6 16.Bxb7 Be5 17.Bxe5 Nxe5 18.Bxa8 Rxa8 19.Rxc5 Nf7 20.Rfc1 Nd6 21.e4 Nf6!? 22.e5 Nd7 1/2-1/2 (61) Hansen, T (2282)-Carlsen,M (2127) Gausdal 2002 ]

[There is some working advantage in the complications (such as they are) after 13.Be3!? Rac8 ( 13...Nxc4 14.Bxc5 Nxb2 15.Nd4 ) 14.b3 b6 and now a knight to either knight-five is worth looking into: 15.Ng5 ( 15.Nb5 ) ]

**13...Nxf4 52 14.gxf4 1**

Black gets the two bishops, but the added White central dark square control compensates. **14...Rad8** 5:40

[ 14...Nc6 led to a lot of "fooling around" before Black lost the path:  
15.Ng5 Bg4 16.h3 Bd7 17.Rfd1 Rfd8 18.e3 Rac8 19.Nd5 e6 20.Nc3 Be8 21.Nge4 Rxd1+ 22.Rxd1 Nb4 23.Nd6 Rb8 24.Nce4 b6 25.a3 Na6 was a blitz game but still... 1-0 (42) Senthil,M (2246)-Khachatryan,A (2086) Chess.com INT 2021 ]  
[ 14...Bxc3!? 15.Rxc3 Rad8 takes a shot at the d-file, ♣ or so. ]

**15.Ne4** 9:34

[ 15.Ne5! shuts down any aspirations: very equal. ]

**15...b6** 1:46 Black has something going. **16.Rcd1**?! 1:46

[ 16.Ne5 f6 17.Nf3 Rd7 18.Rfd1 Rfd8 ]

**16...h6** 2:28

[ 16...Nc6! Here Stockfish speaks up, giving Black a solid (-1, meaning Black plus) -0.99! So as so often, perhaps those bishops (and Black getting at the queenside pawns before White can) matter after all. ]

**17.Ng3**?! 3:23

[ 17.Ne5 g5 18.e3!? Hard to believe, but White stands no worse! ]

**17...Nc6** 5:00 **18.Nh4** 7:51 **Nd4** 15:53

(Diagram)

Quite a fight for the f5 square, of all things. **19.e3** 2:47 **g5**! 3:03 **20.fxg5** 4:17 **hxg5** 1:07 **21.Nf3** 18 **Nxf3+** 8:40  
[ 21...Nxf3+ 22.Bxf3 with the problem for White going back to Steinitz's principles: Black has ...f5 and the knight won't have any active square, thus: the bishops rule. Advantage Black. But Walder decides not to take any risk on his leader position (well,

along with Garcia). ]

1/2-1/2

(2691)-Lupulescu, C (2645) Legnica  
2021 1/2-1/2 ]

**10.f3!?** 3:19 Perhaps a bit too  
provocative for the computer, but I like it!

**10...Ne6** 13 **11.Nge2** 1:13

**g5?N** 1:36 After this Black's king will be  
wandering the desert. That is, there  
won't be a safe kingside.

[Predecessor: 11...0-0 12.0-0 b6  
13.Rad1 Bb7 14.Kh1 Qc7 15.Bf5 c5  
16.dxc5 Qxc5 17.Bxe6 fxe6 18.Nf4  
Qc8 19.Ng6 Re8 20.Nxe7+ Rxe7  
21.Bxf6 gxf6 22.Qg6+ Rg7 23.Qxf6  
Kh7 24.e4 dxe4 25.fxe4 Qc6  
26.Rd3 Rag8 27.Rh3 Rg6 28.Qe7+  
R8g7 29.Rf7 Rxf7 30.Qxf7+ Rg7  
31.Qf4 Rg6 32.Rd3 b5 33.Rd8 b4  
34.Qf8 Rg7 35.Qh8+ Kg6 36.Rd3  
Qc4 37.Ne2 Rf7 38.Qg8+  
1-0 (38) Checa,N (2506)-Tang,A  
(2495) Saint Louis 2019 ]

**12.Bf2** 1:09 **a6** 1:37 Slow bordering on  
irrelevant. And pawn moves on the  
queenside will weaken any thoughts of  
castling over there, also.

[ 12...g4!?

**13.Ng3** 4:23 **c5?! 40**

[ 13...Ng7 14.0-0-0 Be6 15.h4! ]

**14.Nf5?! 1:08**

[ 14.dxc5! Certainly an idea I'm  
familiar with: tricking Black into a  
suspect Isolated Queen Pawn (IQP)  
position. Nxc5 15.Bf5!+- But this is a  
surprise. Superficially it looks like a  
mistake, trading off Black's "bad,"  
undeveloped bishop, but that piece is  
holding reign over some key squares,  
and anyway the computer likes it.  
Compare this to Fischer's famous 22.  
Nxd7!!(?) in Game 7 of their  
Candidates Final, Buenos Aires 1971.  
As it happens, recent analysis has  
tried to show this was the \*wrong\*  
idea, but brilliant it was nonetheless. ]

**14...cxd4 1:22 15.exd4 12 Nf4 4:11**

So Black also gets a nice outpost.

Except only one of the players has a  
pawn available to remove the enemy  
steed... **16.0-0 34 Bxf5 53**

[ 16...Nxd3!? 17.Qxd3 Bxf5 18.Qxf5  
looks for freedom through exchanges,  
but the e-file is still a problem. And if  
Qd7 19.Qxd7+ Kxd7 thinking Black  
has the better bishop, it turns out not  
to matter: 20.Na4! with a clear  
advantage on the dark squares  
anyway. ]

**17.Bxf5 11 Kf8 1:31**

[ 17...0-0 isn't as bad as it might seem on principle. ]

**18.Rfe1** 2:45 **b5?! 18**

[ 18...Kg7 ]

**19.g3** 8:37 **N4h5** 35 Connected rooks is a good thing; connected knights is a not so good thing. **20.a4** 1:46 **b4** 36

**21.Nd1!** 2:35 **Ne8** 1:19 **22.Ne3** 1:38

**Nhg7** 3:12 **23.Qb3** 8:29 **Nc7** 5:47

[ 23...h5!? is still lost but at least gets the "attack" going. ]

**24.Rac1** 1:16 **Bd6?! 2:10**

[ 24...Nce6 25.Bh3! Nxd4 26.Qd1 Nge6 27.Ng4 Nf5 28.Ne5 Nfg7 29.Nc6 ( 29.Rc6; 29.f4! ) ]

**25.Bb1!** 4:19 It happens that any retreat (d3, h3) was winning (according to the computer), but this has a certain esthetic. **25...h5** 1:04 **26.Nxd5** 2:06 Not just a pawn, but the diagonal -- White becomes obsessed with mate along a2-g8. Probably making up for a chess youth without any Scholar's Mates. **26...h4** 1:09 **27.Ba2** 3:20 **Nge6?! 2:21 28.Nxc7** 51 **Bxc7** 1:25

**29.Rxe6!** 3:45 White has so many ways to crash though! The main alternative considered was pushing the d-pawn twice; finally the heavy hammer was brought in.

[ 29.d5 ]

[ 29.Rc6 ]

**29...hxg3** 6:48

[ 29...fxe6 30.Qxe6 Qe7 White was going to play 31.Rxc7 ( 31.Qf5+ is of course better on the principle that with the opponent's king more exposed, queens on is right. They're both totally won. ) 31...Qxe6 32.Bxe6 and d4-d5 etc. ]

**30.hxg3** 1:13

[ Stockfish "likes" 30.Rh6!! gxf2+ 31.Kf1 Kg7 32.Qxf7+ Kxh6 33.Rc6+ Bd6 34.Bb1! ]

**30...Bxg3** 13:10

White saw this, and that it was no good, but got a bit confused... **31.Bxg3?! 1:30** [ 31.Qxb4+ (White is allowed to defend d4!) Kg7 32.Bxg3! fxe6 33.Be5+ and Black's king is not long for the chessboard. ]

**31...Qxd4+** 2 **32.Bf2** 45 **Qf4** 18

(Diagram)

**33.Re4?** 37 I had intended a rook retreat quite a bit earlier, but moved too fast (and not far enough!).

[ 33.Re3 is snug as a bug. That there is that threat on f7 keeps Black from

getting anywhere. ]

**33...Qxc1+** 35 Woops. Not surprisingly though, it's still completely won! **34.Be1** 59 necessary **34...Qc7** 50 **35.Qxb4+** 4:15 **Kg8** 36 **36.f4** 2:00 Staying on the knife-edge.

[ 36.Qe7! "generously" offers to enter a completely won bishops vs. rook ending. ]

**36...Rf8** 2:16 **37.Bc3** 1:24 **Rh7** 4:44 **38.Re5** 7:12 **Rg7** 34 **39.fxg5** 2:04 **Rd8** 1:21

[ 39...Qxe5!? 40.Bxe5 Rxc5+ 41.Kf2 Rxe5 42.Qg4+ ( 42.Qf4 ) 42...Kh8 43.Qf4 Rh5 44.Qf6+ Kh7 and anything wins. ]

**40.Qe4!** 1:51 **Qc8** 7:48

(Diagram)

**41.g6!** 2:30

[ 41.Bxf7+!! is even stronger, if that's possible. ]

**41...Qd7** 3:06 **42.Kf2!** 2:31 **Rf8** 56

**43.Re7?!** 3:13

[ 43.Ke2! would complete the maneuver, with mate following in seven or so. ]

[or 43.Ke1! ]

**43...Qh3** 3:16 **44.Rxf7** 14 **Qh2+** 1:41

**45.Ke1 Qg3+** 2:01 **46.Rf2+** 44

Crosscheck! Quite a setback for Ed, when a win would have put him up to equal first-third. And Winslow now has a dream to tie still...

[ 46.Rf2+ Kh8 47.Qh1+ ( 47.Bxg7+ Kxg7 48.Qe7+ ) ]

## 20th Imre Konig Memorial

The 20<sup>th</sup> Imre Konig Memorial G/45 held on Saturday 4/2 was a great success, with more than 70 participants competing in two sections. NM Michael Aigner showed up, as did FM Ruiyang Yan, but both were eclipsed in the top (over section 1800) by NM Jiangwei Yu and Expert Sricharan Pullela who tied for 1<sup>st</sup> place with 3.5 – 0.5 scores. Both won \$319.50 apiece for their efforts. The under 1800 section also saw a tie, with Christopher Powers and Jayden Lee both scoring a perfect 4 -0, with each netting \$190.50.

The tournament was expertly directed by Local TD Arthur Liou, who happens to be an old student of Aigner's.

For the full cross-tables and list of prize winners: <https://www.milibrary.org/chess-tournaments/20th-konig-memorial-championship-g45-person>

IM Imre Konig at the Mechanics' Institute in the 1950's.

(Editor's Note: FM Paul Whitehead just happened by chance to stumble on the following two games that were left lying about the Chess Office. Both were played in the Konig.)

Chess is everywhere.

## Dr. Judit Sztaray

### Byes, forfeits and extra games

It may be a boring topic for some of you, but since it carries significance throughout the tournament and affects multiple players, I thought to do a refresher on byes, forfeits, and extra games.

Byes: There are three types of byes.

**Half-point bye:** Also known as pre-requested byes. These are worth 0.5 point, and are assigned to players for rounds they request pre-tournament or pre-round, before pairing. While this is worth 0.5 point, the player's rating is not affected, since there was no game played. We also can use half-point bye for any player who joins the tournament late.

SwissSys Standings. Falconer: 1800+

#	Name	ID	Rating	Rd 1	Rd 2	Rd 3	Rd 4	Rd 5	Rd 6	Rd 7	Total	Prize
1	<a href="#">Nathan Fong</a>	13001390	2082	W21	W8	W7					3.0

**IMPORTANT:** I always try to print out a standing where it lists all the rounds of the tournament, so that players can clearly see all their pre-requested byes. This is where **YOUR HELP** comes in: **please always double check your requested byes in future rounds** when you see these types of standings to see if the director did his/her job correctly. This does save us

from the error of unintentionally pairing you when you wanted a half-point bye, and saving someone from a round with no game just a forfeit win.

**Full-point bye:** also known as assigned byes. These are assigned by the tournament director in case there are an odd number of players in a section: there will be one player who will not get an opponent and the full point goes to this player. There are strict rules on who can get a full point bye. Generally it's always the lowest rated player in the lowest section. Of course there are a few other rules that we need to consider: once a

player receives a full point bye, that player cannot get another full point bye again. Also, you don't give a full point bye for someone who has requested a half point bye in either rounds that already happened or will happen in the future. Finally, tournament directors have the discretion to decide whether or not to give a full point bye to unrated players. I personally do not give full point byes to those who are unrated because I want those players to play as many games as possible, so that they get a realistic rating as soon as possible.

**Zero point bye:** When a player uses up all the available half-point byes, they may request byes, and those will be zero point byes. If these are at the end of the tournament they are essentially withdrawals, except if a player withdraws, then they become ineligible for any prizes. However, if they request a zero-point bye, they stay eligible.

**Forfeit wins/losses:** When pairings are made and a player does not show up to play their game, the game is forfeited. The player who didn't show received a forfeit loss, and the opponent received a full point forfeit win. If a player calls in before the round starts but after the pairing has been posted, if the tournament is only USCF-rated, the tournament director has the discretion to repair and post new pairings. Under FIDE rules, however, once the pairings have been posted, the tournament director cannot change the pairings, and cannot repair the section. Therefore, during our Tuesday Night Marathon, once we pair Monday by noon, any person calling in sick/can't make it will receive a forfeit loss, and their opponent is awarded the forfeit win. Again, since there is no game played, these do not affect the players' ratings.

**Extra Game:** Often times when players are faced with receiving a forfeit win, the full point is little consolation for the missed action. These are the scenarios when a good tournament director may try to find an opponent for the player, and find them an opportunity for an extra game. These extra games are reported in a separate "section" of any tournament, and the result of these games do not affect the standing of the tournament. I often say to beginner players: if you win your extra game, you will only receive one point for the tournament standing, not two points.

## Tony's Teasers

1. Barry Andrade 1952. White to play and mate in 2.

2. William Whyatt 1966. White to play and mate in 3.

## **Richard Hack**

### **Stories from the Chess Cafe**

"To play a complicated Rook ending with that much control is amazing."

"That's what these players face in Carlsen."

Sometimes I want to give Café comments without attribution and not always in chronological sequence. I often take notes at such interesting events just for myself and keep lots of them. Perhaps I can bring out the spirit of the discussion in a way similar to what Boris Gelfand describes on page 83 of *Positional Decision Making in Chess* (2017) in regard to his first tournament game with Garry Kasparov (a draw at Linares):

"We analysed it in the postmortem after the game in the old-fashioned way: with lots of people watching and strong players offering suggestions. These days some players tend to rush to their hotel room to get the computer's opinion rather than develop one of their own. I still analyse my games afterward with people such as Kramnik, Aronian, Topalov, Ivanchuk – the guys who grew up learning chess in this way!"

"Lawrence Trent said Hans Niemann is going places. There was the World Championship Rapid and Blitz: with 100 in the Open section, he tied for 6<sup>th</sup> with Gelfand and others. In 18 months he's gained 120 rating points."

There were questions and other considerations concerning this. And there was praise for an article Hans wrote for Chess Life. A lot of us remember when his rating went from 1000 to 2000 in 12 months.

"Carlsen beats Firouzja. Nice attack by Black turns out to be nothing."

Aronian vs. Anand: "As impressive in a way as Rostlewski-Rubinstein. Anand said he was thinking of that game during this one."

"I always play for a win with White, and Aronian always plays for a win with both colours. Especially against me! Aronian is one of those people who wants to beat you more, the more he likes you." (Gelfand, *Dynamic Decision Making in Chess*, 2016).

Queen endings. "Here I like to get the King in the shadow of his Queen."

"This is known in history as the Paul Whitehead check."

"I played it once and got away with it."

Pia Cramling vs. Alexey Rudolph, 1981. "Pia was the 5<sup>th</sup> woman grandmaster. Probably the world's strongest woman for about five years, before the Polgar sisters appeared. . .

A draw in a Rook and Pawn ending; pretty tricky as a rule."

"Gaprindashvilli, Balashov, and Panno tied for first at Lone Pine. Nona Gaprindashvilli has a lawsuit against Netflix for misrepresenting history in their film version of The Queen's Gambit by Walter Tevis."

". . . Qd4 wins, so I played Qd5 to stop it. His nose turned red."
