Falconer TNM Round Four Report

Edward Lewis pulled one out of the hat, bamboozling **Nathan Fong** right and left to gain victory from the ashes of defeat... He now leads the top section with a perfect 4-0. Tied just a half-point behind are experts **Michael Walder**, who was gifted a point when **IM Elliott Winslow** blundered in an equal position, and **Eugenio Garcia**, who steamrolled **Nicholas Weng** right out of the opening.

In the Under 1800 section **Karl Stuart Kingma** played a nice attacking game against **Nursultan Uzakbaev** and now leads with a perfect 4-0. Right behind with 3.5 each are **Paul Reed**, who took advantage of a few tactical errors by **Christian Brickhouse**, and **Rishabh Bhatnagar** who ground out a well-played game vs **Romeo Barreyro**.

Neil Falconer (1923-2014) was a Mechanics' Institute trustee. A remembrance penned by former Chess Room Director **IM John Donaldson** can be found here: <http://www.uschess.org/index.php/April/Neil-Falconer-1923-2014.html>

Nbd7 Glen is a master of the Pirc
 Defense, but Kevin plays aggressively
 and well with the white side. **8.0-0-0**

Going for a real fight with opposite side
 castling. **8...c5 9.d5 a6 10.h3 Bxf3**
11.Bxf3 b5 Black has a clear plan with
 queenside expansion and an easier
 game to play. **12.g4?! Ne5! 13.Qe2**

 up. **15...bxa3 16.Nxa3 Qb4?**

Giving an important tempo for the
 defense. With
 [16...Rab8 17.Bd2 Qa4 Black has
 good winning chances.]

17.Bd2! Qb6 18.Bc3 White has shored
 up the king's defenses and is ok now.

A nice setup with good rook placement.
 Kevin has tripled on the h-file while still

guarding the b2 square for defense.
31...e6?! 32.Nc4! The knight jumps in with strong effect. **32...Rd7 33.Ne3!** Now it heads to the g4 square with decisive effect. **33...e5?!** This loses the queen but

Chess and Politics

The Candidates Tournament has taken an interesting twist with the global politics. Former world championship challenger Sergey Karjakin has been banned from FIDE events for six months and thus will miss this critical event. His outspoken support for the war in Ukraine and Vladimir Putin has raised the ire of the FIDE ethics committee, which is chaired by the respected Swedish lawyer Johann Sigeman. (Some will recall seeing the Sigeman Cup online. The annual grandmaster tournament in Malmo is one of Scandinavia's most important events.)

This mix of politics and chess has not been seen on this scale for decades. Some of us recall the "Match of the Century" in 1972 when the great American Bobby Fischer beat the Russian Boris Spassky while the whole world was captivated by the cold war battle on the chess board. Spassky was a wonderful, sympathetic man who never joined the Communist party despite the personal advantages. He brought the world some understanding of the "enemy" country, and all who met him felt his humanity. He visited the Mechanics' Institute twenty years ago, and his visit is fondly recalled.

The current situation is more akin to the aftermath of WWII when the great world champion Alekhine was barred from playing in the great London victory tournament because of his pro-Nazi writings during the war. Alekhine died in 1946 in Portugal. The official report was from choking on a piece of meat, but the doctor who wrote the death certificate later told he was pressured not to report a murder.

Now we have Karjakin and former world champion Karpov involved in the backlash of the Ukraine war. Karjakin will only lose tournament invitations, but Karpov is a member of the Russian Duma that voted to go to war. Now President Joe Biden is targeting members of the Duma for sanctions.

Should we forget the magnificent games of Karpov and Alekhine because of their politics? Some people will not listen to the music of Michael Jackson because of his posthumous criminal accusations. Of course, we leave it to you, but I believe such art is not to be neglected for the circumstances in which these world champions found themselves. We give below a game from each of them.

1.e4 c5 2.Nf3 Nc6 3.Be2 The theory of the Sicilian Defense was not that developed a hundred years ago. Alekhine and Saemish make logical moves, but Mechanics' Institute TNM players will know better theoretical moves from modern times. 3...e6 4.0-0 d6 5.d4 cxd4 6.Nxd4 Nf6 7.Bf3 Ne5 8.c4 Nxf3+ 9.Qxf3 Be7 10.Nc3 0-0 11.b3 Nd7!? 12.Bb2 Bf6 13.Rad1

As usual Alekhine gets a fully developed, mobile position. 13...a6 14.Qg3 Qc7 15.Kh1 Rd8 This doesn't cause any harm yet, but the rook leaves its place by the side of the black king. 16.f4 b6 17.f5 Be5?

White is a whole queen down. Yet here

Saemisch thought, and to his credit resigned. There is no way out - e.g. 20...Qb7 21.Ne6 Be5 22.Bxe5 dxe5 23.Nxd8 Threatening the queen and f8(Q)+ mating. 1-0

13.Qa4?!

Yasser had success with this move previously, but neglecting development is dangerous. **13...b5!** The pawn sacrifice challenges the White set-up.

14.Qa5

[14.Qxb5 Rb8 15.Qa4 Rxb2 is very nice for Black]

14...Qe4! 15.Kd2 The best move.

Yasser was always brave with his king.

Bxe6 The white king is alone, so Black should have at least perpetual check. Still it is a piece sacrifice. **20.Qxa6 Qa1+ 21.Kd2 Qc3+ 22.Kd1 Bf5** playing for the win **23.Ne1 Rb8 24.Qxa7 Rb6**

25.e3?

A rook ahead, White is helpless. Seirawan resigned.

Mea Culpa!

This week I received a short e-mail from former Chess Room Director Abel Talamantez:

“Hey everyone -

Thanks for annotating the game for the newsletter! I don't think it's a big deal, but I did want to note that the losing move for white was 25.Kf4?? allowing 25...Rg4+, not 25.Ke5. I think the point is still made though so probably no need to update it.

Great newsletter!”

Dr. Judit Sztaray

FIDE rating of our tournaments.

Until 2021 December, both FIDE and US Chess required organizers to send in their tournaments for rating at the end of the tournament. This included all tournaments, even if a tournament lasted for 7-8 weeks, spanning over 2-3 months.

While for tournaments that do not last more than 30 days the rules are the same, this has changed for long "marathon" events that span through two or more months. According to the new FIDE regulations starting 1/1/2022 organizers (and national federations helping the organizers) are required to register their long "marathon" events into monthly segments. What does this mean exactly? What we think of as one big tournament will now be reported in two or more segments and listed under two or more separate pages.

For example, the Shipman TNM spanned through January and February of 2022. This tournament was split into two: Round 1 through 4 were reported at the end of January and Round 5 through 7 were reported at the end of the tournament.

Therefore, these are listed as two separate "events." To complicate matters, FIDE does not recognize "sections" of one tournament, but each section is its own event.

[2nd Shipman Memorial Tuesday Night Marathon - 1800+ Rounds 1-4](#)

[2nd Shipman Memorial Tuesday Night Marathon - Under 1800 Rounds 1-4](#)

[Shipman Memorial Tuesday Night Marathon - 1800+ Rounds 5-7](#)

[Shipman Memorial Tuesday Night Marathon - Under 1800 Rounds 5-7](#)

The good news of this change – and the driving force of the decision – is that the games that are played in any given month will be counted in the next month's rating list at FIDE. Therefore all the games that you played in the month of January in the Shipman TNM were reported in time to count into your February rating at FIDE.

Similar to the Shipman tournament, Falconer TNM is no different. The 7-week long tournament was split up to two, and I sent in the Round 1-4 games to US Chess FIDE Events Manager, Chris Bird, who's our liaison to FIDE and submitting all events organized and held in the US to FIDE.

[Falconer Tuesday Night Marathon - 1800+ Rounds 5-7](#)

[Falconer Tuesday Night Marathon - Under 1800 Rounds 5-7](#)

[Falconer Tuesday Night Marathon - 1800+ Rounds 1-4](#)

[Falconer Tuesday Night Marathon - Under 1800 Rounds 1-4](#)

Ratings at US Chess remain the same: no interim submission is needed, and the long marathon tournaments are only submitted once, at the end of the tournament.

I hope this little explanation is helpful to understand how and when your games are rated. Any questions, my inbox is always open.

Richard Hack's Stories from the Chess Café

Last week's Chess Café featured very lively discussions about Ukraine, the pro-Putin position of Karjakin and Karpov, and most of all, a long look at one of Tal's most brilliant attacking games that epitomizes his dynamic approach to chessplaying.

We began with a reference to Nona Gaprindashvili's lawsuit against The Queen's Gambit production for falsifying the historical record to her detriment in order to heighten the dramatic effect of the protagonist's feats against top male players. Hollywood has a long record of this kind of behavior (especially in sports films), and nowadays movies and novels don't even change the historical names. Maybe S.F. poet Bob Kaufman's "Hollywood" still says it all (almost).

As for Russian treatment of Ukraine, one of our participants detailed a harrowing experience long ago in occupied Poland where the car they were driving was repeatedly rammed from behind by a Russian military vehicle. A tense discussion followed, but no arrest ensued.

A. Allen presented a game from Daily Chess at chess.com (one move per day), an Alapin Sicilian with attacking chances for both sides. Paul and Nick made suggestions like 10. h3: "These little moves make your advance more significant."

Then, with a choice of games sent in, we decided to start with Mikhail Tal vs. Hans-Joachim Hecht from the 9th round of the 1962 Varna Olympiad. Nick de Firmian said with relish, "Tal-Hecht is a work of art." A year after losing the World Championship back to Botvinnik, Tal played 2nd Reserve for the USSR in the event, winning 7 and drawing 6 to outperform all others at that position.

By the 5th move of a Queen's Indian, both sides had attacked third-rank knights with bishops three moves in a row. On the 13th move, Tal's c5 sacrificed a pawn for a big positional advantage. "This is why we love Mikhail Tal," said Nick. "He will neglect his pawns and all these trivial things in favor of the grand and important things."

Mike Walder: "He was the master of timing. A sense of the initiative better than anyone but Fischer."

Paul Whitehead: "The punishment of slow play. Dynamic and speedy moves. It takes courage to play this way."

Mike Walder: "Nick is a fantastic attacker."

Nick de Firmian (modestly): "Well, . . ."

Tal sacs his queen on move 19 by choosing to take Black's KN with exf6. But Black has to give up his queen soon enough. At one point 3 of White's 4 pieces are en prise. After some more exchanges, all 6 of Black's pawns are isolated (2 of them doubled). The remaining rooks chop off a few pawns.

Paul: "Now we get to see some nice technique. Now we get to that part of the game where you take your time."

Trish Gorman: "Did he sac these pieces he knew the pawn game was winning?"

Paul: "Bold play often brings a winning endgame." He moved the position on the screen back to move 12 and went over the sequence again.

Nick: "Every move has a little plus and minus."

By move 40, White had 3 pawns to 2, and two passed pawns to one for Black. Both sides will queen, but White's pawn was one square further advanced. With Black's king on c2 and new queen on d1, white's new queen would check at b3, anchored by his pawn still at a2 (which a Black rook could have taken earlier). After the trade of queens, White would easily promote another pawn, so Black resigned on move 49.

Kudos all around for "The Wizard of Riga." I later read his highly entertaining description of his first game with Reshevsky at about the same time (page 254 in The Life and Games of Mikhail Tal).

Paul: "Tal did everything to mess with your mind. Once you were in his world, he had you."

Another participant mentioned that The Complete Manual of Positional Chess uses 3 Tal Games to show that it's important not to take bait."

The café ended with another fascinating puzzle sent by Azeri GM Gadir Guseinov to Michael Walder, who mentioned that Gadir would be playing in the European Individual Chess Championship between 26 March and 7 April at Terme Catež, a village near Brežice in Slovenia.
